

WEEDED BUBBLE CUTLINE:

STANDARD BUBBLE CUTLINE:

FLUSH WEEDED CUTLINE:

ROUNDED PATCH CUTLINE:

NOTE: If fine details exist, it will be printed & not cut. The cutline must remain relatively smooth and will be taken as the closest line we can match to your artwork. Flush weeding is only suitable for those artworks with smooth outside boundaries. All other artworks will require a "bubble" cutline.

STANDARD BLOCK CUTLINE:

COLOUR MATCHING BLEED:

For all cutline examples shown above, it is possible for us to match the "bubble" or bleed of your transfer to a colour closer to that of the garment they will be printed onto. If you require this service, please request it when you order. Please note that NO extra surcharge is incurred if vector artwork is supplied.

NB: Colour match to fabric will be made as close as possible but a slight variation will always be visible.

SMALL LOGOS - BUBBLE CUTLINE:

Please note: Small Logos (eg Left chest logos) will require a thicker "bubble" than larger logos to ensure detail is not lost in the weeding process.

## ARTWORK NOTES FOR ALL FULL-COLOUR DIGITAL TRANSFERS

### Preferred file format: Vector (EPS, PDF & Ai Files)

Please note that Raster files (jpeg, bmp, gif, psd, png) may incur artwork charge (\$88/hr inc GST / min. charge \$22 inc GST)

### Colour Matching:

Please note that all digital transfers are printed digitally in a CMYK colour profile and thus, Pantone colours cannot be matched to 100% accuracy. CMYK colours will vary slightly due to individual printer and ink calibrations, but all precautions are taken to ensure colour representations are as accurate as possible.

### Low-Res / Poor Quality Artwork:

Mabuzi reserve the right to refuse any artwork or request alternate artwork format(s) to ensure best possible print result is achieved for all jobs.
